UX/UI Designer in Berlin. Paid client work on operational flows and service websites, from research to delivered interface design. This portfolio is built in React and Vite.

PROFESSIONAL EXPERIENCE

UX/UI Designer: Marcelo Gramas website

Paid freelance client project 2026

First website for a landscaping company in Brazil, from client research to a live site.

- Interviewed 4 clients, which corrected 2 of my starting hypotheses. Designed the site structure for three kinds of buyer, the visual identity and logo, and a design system shared by code and Figma.
- 8 contacts through the site and 5 new jobs in the first month, by the client's count.

UX/UI Designer: Delivery workflow

Paid freelance client project, Vulpes Studio 2025

Redesign of a delivery confirmation flow for a regional delivery company in Brazil.

- I led the field sessions and designed the receiver confirmation flow.
- Field research with 5 couriers. Pilot with 12 drivers over three weeks.
- 7 to 8 seconds faster per stop and 2 fewer taps. Record compliance from 92% to 98%, figures from the development and data team.

UX/UI and Web Designer: Dr. Hélio

Paid freelance client project 2024

Research, information architecture, visual identity, responsive UI, and website delivery for a plastic surgeon.

- Used patient interviews and recurring social-media questions to define the information architecture, content hierarchy, and responsive interface.
- Created the visual identity and delivered the website for independent client updates; the identity remains in use.

SELECTED EDUCATIONAL PROJECT

DuoPet

Course project 2023

Educational UX course prototype for veterinary appointment booking, pair work with Leticia Magri.

- Both of us worked across a survey of 164 pet owners, 5 interviews, and two small-sample usability rounds.

SKILLS

UX Design

Field observation and interviews, interaction design, prototyping, and a client style guide. Usability rounds on the DuoPet course project.

Tools

Figma, FigJam, React/Vite, HTML/CSS, Tailwind, Cursor, Codex, Claude, Notion, Linear.
